PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years shipping end-to-end production platforms — from pixel-perfect Next.js UIs to PostgreSQL schemas, Node.js APIs, and AWS cloud infrastructure. Delivered 15+ live products across EdTech, travel, food-tech, news, and e-commerce verticals. Expert in Next.js 14 App Router, Prisma ORM, RBAC authentication, REST & GraphQL APIs, and hybrid SSR/SSG rendering. Known for closing the loop between design, backend, and deployment without handoff bottlenecks.

WORK EXPERIENCE

EduEngine Technology *Full-Stack Engineering Division · Sep 2024 – Dec 2025*

Full-Stack Developer

Jan 2025 – Dec 2025

Promoted based on delivery quality — expanded scope to own full backend, cloud infrastructure, and deployment pipelines.

- Architected and shipped Tripway Holidays end-to-end (tripwayholidays.in) — Next.js 14 App Router frontend, Firebase real-time booking backend, and payment webhooks; achieved sub-1.5s LCP and 99.9% uptime.
- Designed 12-table normalized PostgreSQL schema for WebrainTech EdTech platform with Prisma ORM and Redux Toolkit; reduced average API response time ~40% vs. prior flat-data structure, onboarding 500+ learners in 60 days.
- Shipped hybrid SSR/SSG with Next.js Server Actions across 3 platforms — lifted Core Web Vitals 45% and grew organic search impressions 40% in 90 days.
- Cut AWS infrastructure spend ~30% via EC2 right-sizing, S3 lifecycle policies, and CloudFront CDN — reducing origin server load 60% at peak traffic.
- Built shared Tailwind CSS + Shadcn/UI component library used across 4 products, cutting design-to-code handoff from 3 days to 1 and eliminating cross-platform UI inconsistencies.
- Implemented RBAC middleware (NextAuth.js + JWT) across 3 apps — zero privilege-escalation incidents post-launch across 1,000+ active users.
- Deployed AWS EC2 + GCP Cloud Run with auto-scaling, sustaining 3× traffic spikes with zero downtime during peak events.

Next.js Developer

Sep 2024 – Dec 2024

- Joined as a specialist Next.js Developer focusing on frontend architecture and SSR/SSG delivery.*
- Delivered 5 full-stack web applications — Next.js + Node.js frontends with MySQL/MongoDB backends — all on schedule with zero critical post-launch bugs.
- Engineered 10+ REST API endpoints with full request validation, structured error handling, and idempotency guards; integrated payment, SMS, and email providers handling 500+ daily transactions.
- Optimized MySQL and MongoDB query performance via composite indexing — slashed average query time from 320ms to 85ms across high-frequency endpoints.
- Achieved 85%+ test coverage across shared component libraries using Jest + React Testing Library. Configured GitHub Actions for CI linting and automated staging deployments on every PR.
- Led bi-weekly code reviews for 4-engineer team, reducing defect escape rate 25% over 3 months by enforcing schema-first API design and component isolation standards.

- ▶ Improved page load time 35% via lazy loading, Vite code-splitting, and image optimization on GCP-hosted applications.

▶

Pinkvilla *Frontend Engineer — Shopify & HTML*

Frontend Engineer

Nov 2023 – Mar 2024

- ▶ Converted 20+ Zeplin mockups into pixel-perfect, production-ready components (<2px deviation); halved QA revision cycles by establishing a reusable pattern library.
- ▶ Extended Shopify Liquid storefront and metafield APIs for 3 brands — resolved checkout edge cases and improved mobile conversion rate 15%.
- ▶ Built 8 responsive HTML email templates — achieved 98% inbox delivery rate and measurably lifted open rates on the client's largest campaign sends.

WebsoftEdge *Full-Stack Mobile Developer*

Full-Stack Mobile Developer

Mar 2023 – Nov 2023

- ▶ Shipped cross-platform Flutter app to Google Play Store — 1,000+ installs in Month 1, <0.5% crash rate via structured logging and pre-release QA automation.
- ▶ Designed 12 RESTful API endpoints in Laravel/PHP with versioned MySQL migrations; reduced Flutter ↔ backend integration time 35% via Postman contract-first development.

Centurus Technologies *Junior Developer*

Junior Developer

Jul 2022 – Feb 2023

- ▶ Built Core PHP APIs and responsive HTML/CSS interfaces for 6 client websites; designed normalized MySQL + Firebase schemas for 3 live Flutter products with sub-200ms API response times.

FEATURED PROJECTS
